Full Length Article

Tunable synthesis of nanocarbon architectures and their application in advanced symmetric supercapacitors

Dewei Wang, Yatong Wang, Wen Xu, Wenhui Xu

PII: S0169-4332(18)30636-6
DOI: <https://doi.org/10.1016/j.apsusc.2018.02.273>
Reference: APSUSC 38731

To appear in: *Applied Surface Science*

Received Date: 18 January 2018
Revised Date: 6 February 2018
Accepted Date: 27 February 2018

Please cite this article as: D. Wang, Y. Wang, W. Xu, W. Xu, Tunable synthesis of nanocarbon architectures and their application in advanced symmetric supercapacitors, *Applied Surface Science* (2018), doi: <https://doi.org/10.1016/j.apsusc.2018.02.273>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Tunable synthesis of nanocarbon architectures and their application in advanced symmetric supercapacitors

Dewei Wang *, Yatong Wang, Wen Xu, Wenhui Xu

College of Materials Science and Engineering, North Minzu University (Beifang University of Nationalities), Yinchuan 750021, People's Republic of China.
