Full Length Article

Preparation, Quantitative Surface Analysis, Intercalation Characteristics and Industrial Implications of Low Temperature Expandable Graphite

Tiefeng Peng, Bin Liu, Xuechao Gao, Liqun Luo, Hongjuan Sun

PII: S0169-4332(18)30759-1

DOI: <https://doi.org/10.1016/j.apsusc.2018.03.089>

Reference: APSUSC 38837

To appear in: *Applied Surface Science*

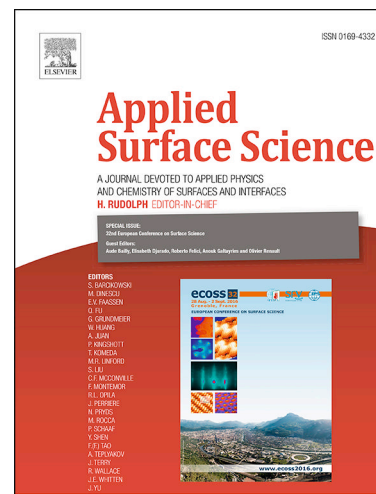

Received Date: 15 December 2017

Revised Date: 25 February 2018

Accepted Date: 11 March 2018

Please cite this article as: T. Peng, B. Liu, X. Gao, L. Luo, H. Sun, Preparation, Quantitative Surface Analysis, Intercalation Characteristics and Industrial Implications of Low Temperature Expandable Graphite, *Applied Surface Science* (2018), doi: <https://doi.org/10.1016/j.apsusc.2018.03.089>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Preparation, Quantitative Surface Analysis, Intercalation
Characteristics and Industrial Implications of Low Temperature
Expandable Graphite**
