## Full Length Article

Surface amplification of pencil graphite electrode with polypyrrole and reduced graphene oxide for fabrication of a guanine/adenine DNA based electrochemical biosensors for determination of didanosine anticancer drug

Hassan Karimi-Maleh, Asma Bananezhad, Mohammad R. Ganjali, Parviz Norouzi, Abdolhossein Sadrnia

PII: S0169-4332(18)30255-1  
DOI: <https://doi.org/10.1016/j.apsusc.2018.01.237>  
Reference: APSUSC 38376

To appear in: *Applied Surface Science*

Received Date: 20 September 2017  
Revised Date: 18 January 2018  
Accepted Date: 27 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
