

## Accepted Manuscript

Title: Contact angle control of sessile drops on a tensioned web

Authors: Janghoon Park, Dongguk Kim, Changwoo Lee

PII: S0169-4332(17)33740-6  
DOI: <https://doi.org/10.1016/j.apsusc.2017.12.152>  
Reference: APSUSC 38022

To appear in: *APSUSC*

Received date: 2-8-2017  
Revised date: 16-12-2017  
Accepted date: 18-12-2017

Please cite this article as: Park J, Kim D, Lee C, Contact angle control of sessile drops on a tensioned web, *Applied Surface Science* (2010), <https://doi.org/10.1016/j.apsusc.2017.12.152>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Contact angle control of sessile drops on a tensioned web

### Highlights:

- The droplet contact angle can be varied by web tension.
- The lateral web tension difference has a significant impact on the contact angle.
- The contact angle in the width direction can be calibrated by the casting distance.
