Title: Investigation of tribological properties of graphene oxide reinforced ultrahigh molecular weight polyethylene under artificial seawater lubricating condition

Authors: Wenchao Pang, Zifeng Ni, JiaLiang Wu, Yongwu Zhao

PII: S0169-4332(17)33061-1
DOI: <https://doi.org/10.1016/j.apsusc.2017.10.115>
Reference: APSUSC 37458

To appear in: *APSUSC*

Received date: 20-7-2017
Revised date: 8-10-2017
Accepted date: 16-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Investigation of tribological properties of graphene oxide reinforced
ultrahigh molecular weight polyethylene under artificial seawater
lubricating condition
