Title: Assessment of the adsorption mechanism of Flutamide anticancer drug on the functionalized single-walled carbon nanotube surface as a drug delivery Vehicle: An Alternative Theoretical Approach Based on DFT and MD

Authors: Maedeh Kamel, Heidar Raissi, Ali Morsali, Mahnaz Shahabi

PII: S0169-4332(17)33117-3
 DOI: <https://doi.org/10.1016/j.apsusc.2017.10.165>
 Reference: APSUSC 37508

To appear in: *APSUSC*

Received date: 29-6-2017
Revised date: 28-9-2017
Accepted date: 24-10-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Assessment of the adsorption mechanism of Flutamide anticancer drug on the
functionalized single-walled carbon nanotube surface as a drug delivery
Vehicle: An Alternative Theoretical Approach Based on DFT and MD**
