

## Accepted Manuscript

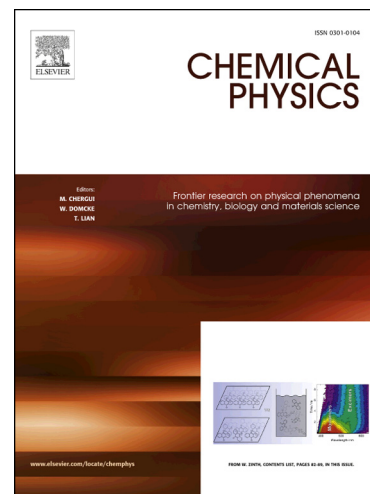

Insights on the Effect of Different Reverse Micellar Confinements on the Photo-Induced Acidity of Soluble Naphthols: A Detailed Spectroscopic Account

Sudipta Panja, Deb Kumar Khatua, Prabal Pramanik, Mintu Halder

PII: S0301-0104(17)30985-0  
DOI: <https://doi.org/10.1016/j.chemphys.2018.04.019>  
Reference: CHEMPH 10007

To appear in: *Chemical Physics*

Received Date: 26 November 2017  
Accepted Date: 29 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
