Anion Halogen Bonding Effect on Solvatochromism and Excited State Dynamics of Hemicyanine Dye in Chlorinated Solvents

Karunakaran Ponnusamy, Chellappan Selvaraju, Singaravelu Chandra Mohan, Kandasamy Jothivenkatachalam

PII: S0022-2313(18)30153-4
DOI: <https://doi.org/10.1016/j.jlumin.2018.05.055>
Reference: LUMIN15637

To appear in: *Journal of Luminescence*

Received date: 26 January 2018
Revised date: 10 April 2018
Accepted date: 22 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Anion Halogen Bonding Effect on Solvatochromism and Excited State Dynamics of Hemicyanine Dye in Chlorinated Solvents
