Effect of pH on Eosin Y/PAMAM interactions studied from absorption spectroscopy and molecular dynamics simulations

Luis F. Barraza, Matías Zuñiga, Joel B. Alderete, Ernesto M. Arbeloa, Verónica A. Jiménez

PII: S0022-2313(17)31890-2
DOI: <https://doi.org/10.1016/j.jlumin.2018.03.068>
Reference: LUMIN15487

To appear in: *Journal of Luminescence*

Received date: 7 November 2017
Revised date: 4 January 2018
Accepted date: 23 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of pH on Eosin Y/PAMAM interactions studied from absorption spectroscopy and molecular dynamics simulations
