Using a Local Low Rank plus Sparse Reconstruction to Accelerate Dynamic Hyperpolarized ^{13}C Imaging using the bSSFP Sequence

Eugene Milshteyn, Cornelius von Morze, Galen D. Reed, Hong Shang, Peter J. Shin, Peder E.Z. Larson, Daniel B. Vigneron

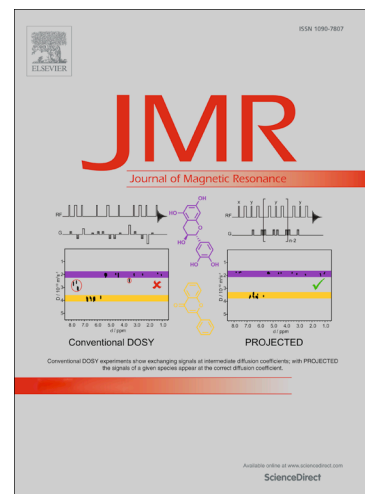

PII: S1090-7807(18)30088-0
DOI: <https://doi.org/10.1016/j.jmr.2018.03.006>
Reference: YJMRE 6272

To appear in: *Journal of Magnetic Resonance*

Received Date: 14 December 2017
Revised Date: 3 March 2018
Accepted Date: 9 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
