CO₂-spherical activated carbon as a new adsorbent for Methylene Blue removal: Kinetic, equilibrium and thermodynamic studies

Karen C. Bedin, Isis P.A.F. Souza, André L. Cazetta, Lucas Spessato, Amanda Ronix, Vitor C. Almeida

PII: S0167-7322(18)32878-2
DOI: doi:[10.1016/j.molliq.2018.08.020](https://doi.org/10.1016/j.molliq.2018.08.020)
Reference: MOLLIQ 9465
To appear in: *Journal of Molecular Liquids*
Received date: 2 June 2018
Revised date: 1 August 2018
Accepted date: 4 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

CO₂-spherical activated carbon as a new adsorbent for Methylene Blue removal:**Kinetic, equilibrium and thermodynamic studies**
