Multivariate modeling via artificial neural network applied to enhance methylene blue sorption using graphene-like carbon material prepared from edible sugar

Lakshmi Prasanna Lingamdinne, Jiwan Singh, Jong-Soo Choi, Yoon-Young Chang, Jae-Kyu Yang, Rama Rao Karri, Janardhan Reddy Koduru

PII: S0167-7322(18)31602-7
DOI: doi:[10.1016/j.molliq.2018.06.022](https://doi.org/10.1016/j.molliq.2018.06.022)
Reference: MOLLIQ 9220
To appear in: *Journal of Molecular Liquids*
Received date: 26 March 2018
Revised date: 4 June 2018
Accepted date: 6 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Multivariate modeling via artificial neural network applied to enhance methylene blue sorption using graphene-like carbon material prepared from edible sugar
