

## Accepted Manuscript

Development and optimization of surfactants and UV filters formulation in sunscreens based on organic and nanocomposite molecules using experimental design and nanodispersion techniques

Hadi Ghasemi, Saeed Masoum

PII: S0167-7322(18)32871-X  
DOI: doi:[10.1016/j.molliq.2018.07.003](https://doi.org/10.1016/j.molliq.2018.07.003)  
Reference: MOLLIQ 9324  
To appear in: *Journal of Molecular Liquids*  
Received date: 2 June 2018  
Revised date: 28 June 2018  
Accepted date: 1 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Development and optimization of surfactants and UV filters formulation in sunscreens  
based on organic and nanocomposite molecules using experimental design and  
nanodispersion techniques**
