Decomposition of hydroxylammonium nitrate in a low pressure flowing thermal capillary system

Forrest G. Kidd, Nicholas R. Taylor, Kristina M. Lemmer

PII: S0167-7322(17)35707-0
DOI: [doi:10.1016/j.molliq.2018.04.065](https://doi.org/10.1016/j.molliq.2018.04.065)
Reference: MOLLIQ 8968
To appear in: *Journal of Molecular Liquids*
Received date: 5 January 2018
Revised date: 9 April 2018
Accepted date: 10 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Decomposition of Hydroxylammonium Nitrate in a Low Pressure Flowing Thermal Capillary System
