Measurement and correlation of clotrimazole solubility in ethanol + water mixtures at T=(293.2 to 313.2) K

Fatemeh Saadatfar, Ali Shayanfar, Elaheh Rahimpour, Mohammad Barzegar-Jalali, Fleming Martinez, Mohammad Bolourtchian, Abolghasem Jouyban

PII: S0167-7322(18)30568-3
DOI: doi:[10.1016/j.molliq.2018.02.068](https://doi.org/10.1016/j.molliq.2018.02.068)
Reference: MOLLIQ 8710
To appear in: *Journal of Molecular Liquids*
Received date: 1 February 2018
Revised date: 13 February 2018
Accepted date: 14 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Measurement and correlation of clotrimazole solubility in ethanol + water mixtures at $T=(293.2 \text{ to } 313.2) \text{ K}$
