Accepted Manuscript

Modified Geometric Truncation of the Scattering Phase Function

Alexander Radkevich

PII: S0022-4073(18)30154-7
DOI: 10.1016/j.jqsrt.2018.05.029
Reference: JQSRT 6111

To appear in: *Journal of Quantitative Spectroscopy & Radiative Transfer*

Received date: 28 February 2018
Revised date: 23 May 2018
Accepted date: 27 May 2018

Please cite this article as: Alexander Radkevich , Modified Geometric Truncation of the Scattering Phase Function, *Journal of Quantitative Spectroscopy & Radiative Transfer* (2018), doi: 10.1016/j.jqsrt.2018.05.029

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Criterion for selection of the angle of truncation is proposed;
- New form of the replacement phase function within the forward cone;
- Preservation of integral characteristics of the phase function is considered;
- Continuity of the phase function at the angel of truncation is considered;
- Comparison of radiance computed various truncation methods is performed.
