Optical trapping and manipulation of single particles in air: Principles, technical details, and applications.

Zhiyong Gong , Yong-Le Pan , Gorden Videen , Chuji Wang

PII: S0022-4073(18)30044-X
DOI: [10.1016/j.jqsrt.2018.04.027](https://doi.org/10.1016/j.jqsrt.2018.04.027)
Reference: JQSRT 6073

To appear in: *Journal of Quantitative Spectroscopy & Radiative Transfer*

Received date: 24 January 2018
Revised date: 23 April 2018
Accepted date: 24 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- **Optical trapping technique for diverse single particles in air is reviewed**
- **Technical details of optical trapping for single particles in air are summarized**
- **Recent applications of single optically trapped airborne particles are discussed**
