Light pollution offshore: zenithal sky glow measurements in the Mediterranean coastal waters

Xavier Ges , Salvador Bará , Manuel García-Gil ,
Jaime Zamorano , Salvador J. Ribas , Eduard Masana

PII: S0022-4073(17)30863-4
DOI: [10.1016/j.jqsrt.2018.02.014](https://doi.org/10.1016/j.jqsrt.2018.02.014)
Reference: JQSRT 5995

To appear in: *Journal of Quantitative Spectroscopy & Radiative Transfer*

Received date: 14 November 2017
Revised date: 3 February 2018
Accepted date: 8 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- The sea is a convenient stage for evaluating light pollution propagation models
- A system for zenithal sky brightness monitoring on board of vessels is demonstrated
- Data recorded in Mediterranean coastal waters are compatible with predictions
