Synthesis and formation mechanism of iron nanoparticles in graphitized carbon matrix using biochar from biomass model compounds as a support

Sai Teja Neeli, Hema Ramsurn

PII: S0008-6223(18)30330-0

DOI: [10.1016/j.carbon.2018.03.079](https://doi.org/10.1016/j.carbon.2018.03.079)

Reference: CARBON 13022

To appear in: *Carbon*

Received Date: 12 October 2017

Revised Date: 23 March 2018

Accepted Date: 24 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title page

Names of the Authors: Sai Teja Neeli, Hema Ramsurn

Title: Synthesis and formation mechanism of iron nanoparticles in graphitized carbon matrix using biochar from biomass model compounds as a support

Affiliation and address of the authors: The Russell School of Chemical Engineering, The University of Tulsa, OK 74104, United States

E-mail address of the corresponding author: hema-ramsurn@utulsa.edu
