Explaining the role and mechanism of carbon matrices in enhancing reaction reversibility of metal oxide anodes for high performance Li ion batteries

Alessandro Palmieri, Neil Spinner, Shuai Zhao, William E. Mustain

PII: S0008-6223(18)30068-X

DOI: [10.1016/j.carbon.2018.01.059](https://doi.org/10.1016/j.carbon.2018.01.059)

Reference: CARBON 12800

To appear in: *Carbon*

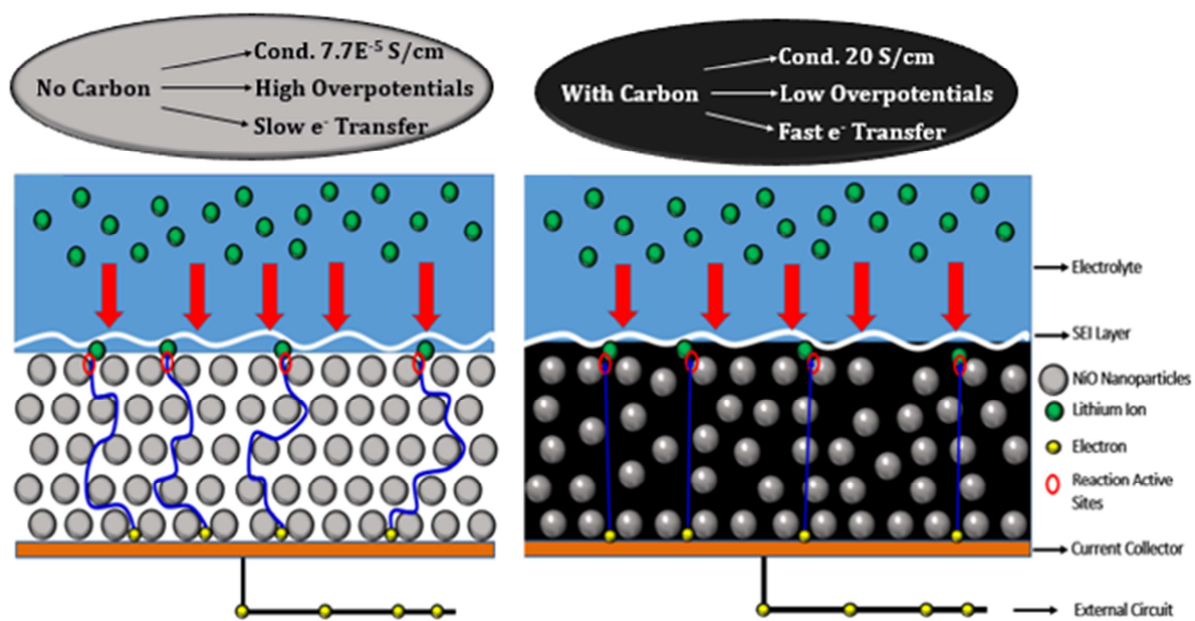

Received Date: 22 November 2017

Revised Date: 13 January 2018

Accepted Date: 15 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
