Targeting of drug-loaded nanoparticles to tumor sites increases cell death and release of danger signals

Magdalena Alev, Laura Egenberger, Laura Mühleisen, Bianca Weigel, Benjamin Frey, Ralf P. Friedrich, Marina Pöttler, Christoph Alexiou, Christina Janko

PII: S0168-3659(18)30401-2
DOI: doi:[10.1016/j.jconrel.2018.07.007](https://doi.org/10.1016/j.jconrel.2018.07.007)
Reference: COREL 9367
To appear in: *Journal of Controlled Release*
Received date: 16 March 2018
Revised date: 12 June 2018
Accepted date: 2 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Targeting of drug-loaded nanoparticles to tumor sites increases cell death and release of danger signals
