This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***In vivo* migration of mesenchymal stem cells to burn injury sites and their therapeutic effects in a living mouse model**

Short title: Migration and therapeutic effect of mesenchymal stem cells in burn injury

Authors: Eun Jung Oh^{1, †}, Ho Won Lee^{2, †}, Senthilkumar Kalimuthu², Tae Jung Kim¹, Hyun Mi Kim¹, Se Hwan Baek², Liya Zhu², Ji Min Oh², Seung Hyun Son², Ho Yun Chung^{1, *}, Byeong-Cheol Ahn^{2, *}

Affiliations:

¹Department of Plastic and Reconstructive Surgery, ²Department of Nuclear Medicine, Kyungpook National University, School of Medicine, Daegu, South Korea

† The first two authors contributed equally to this study.
