

Accepted Manuscript

Gelatin- hydroxyapatite- calcium sulphate based biomaterial for long term sustained delivery of bone morphogenic protein-2 and zoledronic acid for increased bone formation: In-vitro and in-vivo carrier properties

Deepak Bushan Raina, David Larsson, Filip Mrkonjic, Hanna Isaksson, Ashok Kumar, Lars Lidgren, Magnus Tägil

PII: S0168-3659(18)30005-1
DOI: doi:[10.1016/j.jconrel.2018.01.006](https://doi.org/10.1016/j.jconrel.2018.01.006)
Reference: COREL 9120
To appear in: *Journal of Controlled Release*
Received date: 1 October 2017
Revised date: 30 December 2017
Accepted date: 8 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Gelatin- Hydroxyapatite- Calcium Sulphate Based Biomaterial for Long Term Sustained Delivery of Bone Morphogenic Protein-2 and Zoledronic Acid for Increased Bone Formation: In-vitro and In-vivo Carrier Properties
