This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Conflict of interest:** AD is a contracted consultant for BTG, Farnham, UK. Patent WO 2012/073188 A1 was issued and licensed to BTG by AD, PEB, OJ. All other authors do not declare a conflict of interest.

**Financial support:** The animal study was partially funded by a research grant from Biocompatibles Ltd./BTG, Farnham, UK to AD, PEB and OJ.

**Abbreviations:** DEB(s): drug-eluting bead(s), TACE: transarterial chemoembolization, MALDI-SRM/MSI: matrix-assisted laser desorption ionization with selected reaction monitoring mass spectrometry imaging, FITC: Fluorescein isothiocyanate, LC-MS/MS: liquid chromatography with tandem mass spectrometry detection, IC<sub>50</sub>: half maximal inhibitory concentration, ROI: region of interest, LOD: limit of detection

**Keywords:** fluorescence imaging; MALDI-SRM mass spectrometry imaging; transarterial chemoembolization; sunitinib; drug-eluting beads; biodistribution

**Author's contributions:** Animal study: PEB, RD, AD, OJ; DEBs preparation, Tissue sectioning, Fluorescence imaging: KF, OJ, GB; MSI: AK, GH

**Compound:** Sunitinib: PubChem CID 5329102
