Quantum dots attached to graphene oxide for sensitive detection of ascorbic acid in aqueous solutions

Nandhini Arumugam, JongSung Kim

PII: S0928-4931(17)34527-7
DOI: [doi:10.1016/j.msec.2018.07.017](https://doi.org/10.1016/j.msec.2018.07.017)
Reference: MSC 8729
To appear in: *Materials Science & Engineering C*
Received date: 18 November 2017
Revised date: 23 June 2018
Accepted date: 7 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Quantum dots attached to graphene oxide for sensitive detection of ascorbic acid in aqueous solutions

Nandhini Arumugam and JongSung Kim*

Department of Chemical & Biological Engineering, Gachon University
