

Accepted Manuscript

Polymer-amino-functionalized silica composites for the sustained-release multiparticulate system

Agnieszka Kierys, Andrzej Sienkiewicz, Marta Grochowicz, Regina Kasperek

PII: S0928-4931(17)32482-7
DOI: <https://doi.org/10.1016/j.msec.2017.12.020>
Reference: MSC 8366
To appear in: *Materials Science & Engineering C*
Received date: 29 June 2017
Revised date: 7 September 2017
Accepted date: 19 December 2017

Please cite this article as: Agnieszka Kierys, Andrzej Sienkiewicz, Marta Grochowicz, Regina Kasperek , Polymer-amino-functionalized silica composites for the sustained-release multiparticulate system. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Msc(2017), <https://doi.org/10.1016/j.msec.2017.12.020>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Polymer-amino-functionalized silica composites for the sustained-release multiparticulate system
