Extended release of proteins following encapsulation in hydroxyapatite/chitosan composite scaffolds for bone tissue engineering applications

Declan M. Devine, Eilish Hctor, Jessica S. Hayes, Eoin Sheehan, Christopher H. Evans

PII: S0928-4931(16)32245-7
DOI: doi:[10.1016/j.msec.2017.11.001](https://doi.org/10.1016/j.msec.2017.11.001)
Reference: MSC 8300
To appear in: *Materials Science & Engineering C*
Received date: 17 November 2016
Revised date: 16 August 2017
Accepted date: 9 November 2017

Evans , Extended release of proteins following encapsulation in hydroxyapatite/chitosan composite scaffolds for bone tissue engineering applications. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Msc(2017), doi:[10.1016/j.msec.2017.11.001](https://doi.org/10.1016/j.msec.2017.11.001)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Extended release of proteins following encapsulation in hydroxyapatite/chitosan composite scaffolds for bone tissue engineering applications
