Adsorption of tranexamic acid on hydroxyapatite: Toward the development of biomaterials with local hemostatic activity

Stéphanie Sarda, Farid Errassifi, Olivier Marsan, Anne Geffre, Catherine Trumel, Christophe Drouet

PII: S0928-4931(16)30330-7
DOI: doi: [10.1016/j.msec.2016.04.032](https://doi.org/10.1016/j.msec.2016.04.032)
Reference: MSC 6412

To appear in: *Materials Science & Engineering C*

Received date: 5 January 2016
Revised date: 16 March 2016
Accepted date: 11 April 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Adsorption of tranexamic acid on hydroxyapatite: towards the development of biomaterials with local hemostatic activity
