Slip transmission of high angle grain boundaries in body-centered cubic metals:
Micropillar compression of pure Ta single and bi-crystals

Jordan S. Weaver, Nan Li, Nathan A. Mara, David R. Jones, Hansohl Cho, Curt A. Bronkhorst, Saryu J. Fensin, George T. Gray, III

PII: S1359-6454(18)30514-7

DOI: [10.1016/j.actamat.2018.06.046](https://doi.org/10.1016/j.actamat.2018.06.046)

Reference: AM 14675

To appear in: *Acta Materialia*

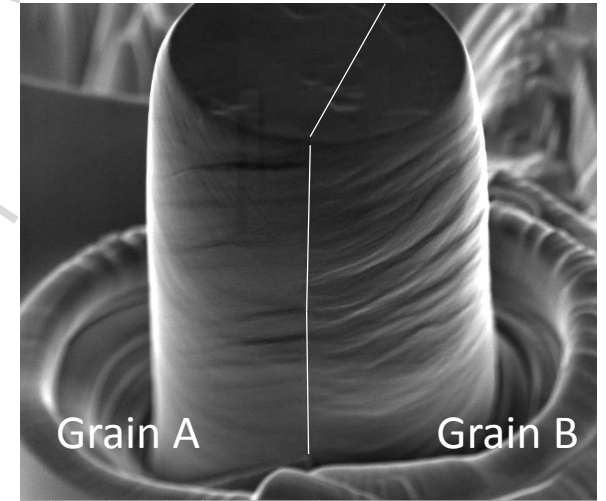

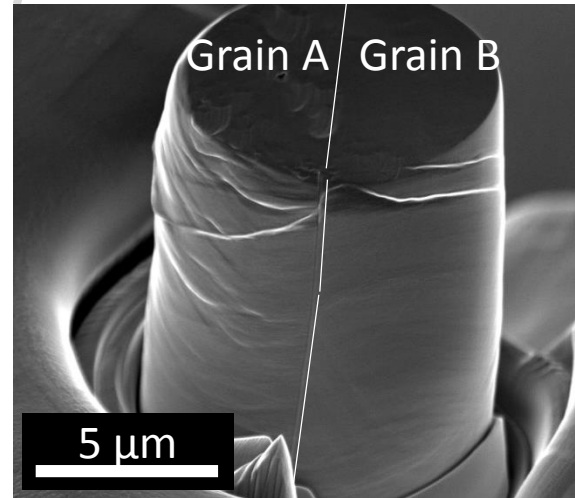

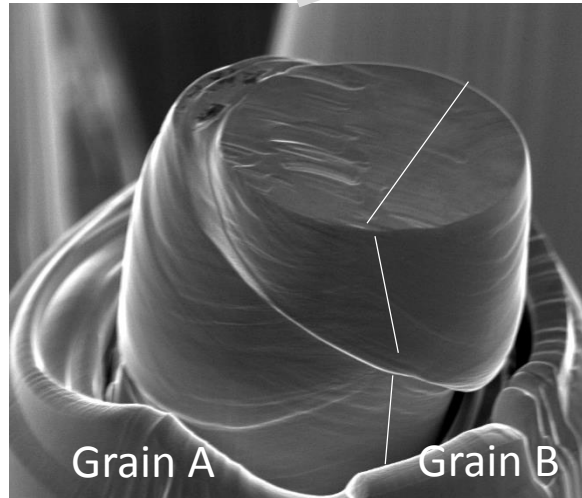

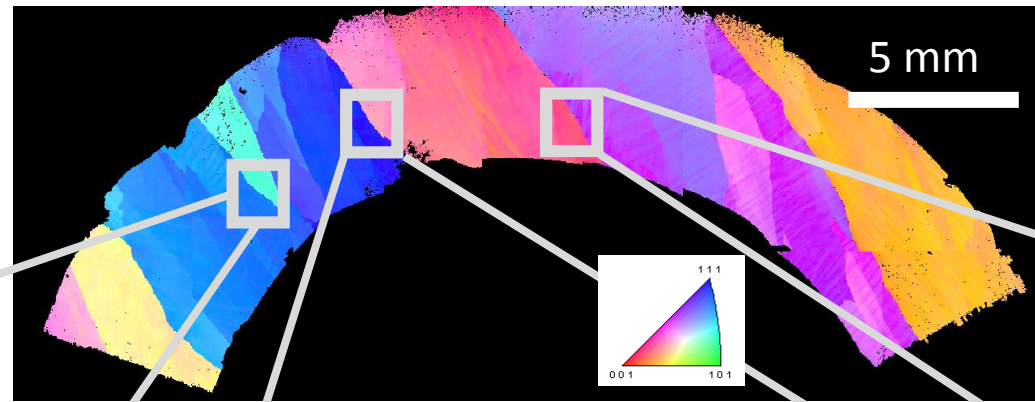

Received Date: 18 May 2018

Accepted Date: 29 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Micropillar compression testing of bi-crystalline Ta
