Effects of porosity and strain rate on the uniaxial compressive response of ice-templated sintered macroporous alumina

Mahesh Banda, Dipankar Ghosh

PII: S1359-6454(18)30127-7

DOI: [10.1016/j.actamat.2018.02.027](https://doi.org/10.1016/j.actamat.2018.02.027)

Reference: AM 14383

To appear in: *Acta Materialia*

Received Date: 5 October 2017

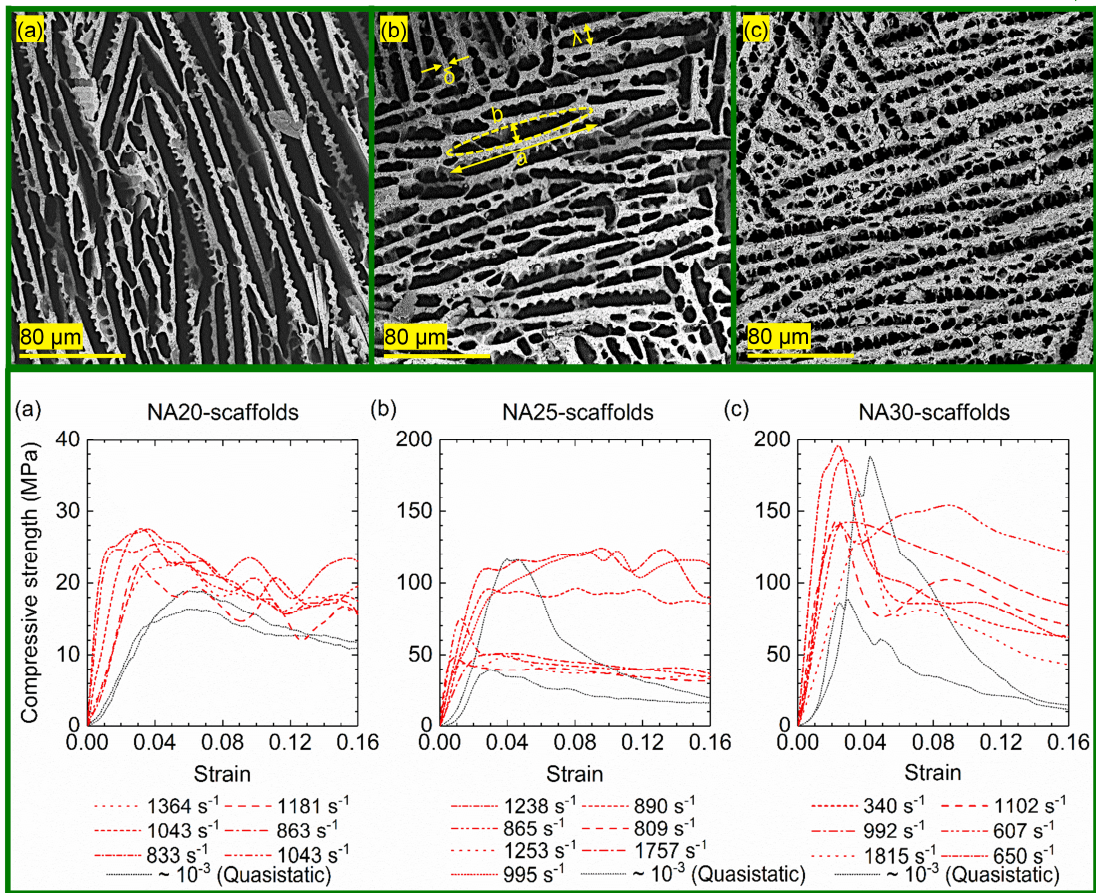

Revised Date: 3 February 2018

Accepted Date: 10 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Relative density of ice-templated ceramic scaffolds
