Enhancing fiber/matrix bonding in polypropylene fiber reinforced cementitious composites by microbially induced calcite precipitation pre-treatment

Yifei Hao, Liang Cheng, Hong Hao, Mohamed A. Shahin

PII: S0958-9465(17)30745-X

DOI: [10.1016/j.cemconcomp.2018.01.001](https://doi.org/10.1016/j.cemconcomp.2018.01.001)

Reference: CECO 2970

To appear in: *Cement and Concrete Composites*

Received Date: 20 August 2017

Revised Date: 17 November 2017

Accepted Date: 2 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Enhancing fiber/matrix bonding in polypropylene fiber reinforced cementitious**
2 **composites by microbially induced calcite precipitation pre-treatment**
