Nacre-inspired composite design approaches for large-scale cementitious members and structures

Daniel G. Soltan, Victor C. Li

PII: S0958-9465(17)30841-7

DOI: [10.1016/j.cemconcomp.2018.02.006](https://doi.org/10.1016/j.cemconcomp.2018.02.006)

Reference: CECO 2991

To appear in: *Cement and Concrete Composites*

Received Date: 11 September 2017

Revised Date: 17 November 2017

Accepted Date: 9 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Nacre-inspired composite design approaches for large-scale cementitious members and structures
