Experimental analysis of mechanical properties and microstructure of long glass fiber reinforced polypropylene processed by rapid heat cycle injection molding

L. Crema, M. Sorgato, F. Zanini, S. Carmignato, G. Lucchetta

PII: S1359-835X(18)30019-8
DOI: <https://doi.org/10.1016/j.compositesa.2018.01.019>
Reference: JCOMA 4900

To appear in: *Composites: Part A*

Received Date: 14 July 2017
Revised Date: 28 December 2017
Accepted Date: 18 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental analysis of mechanical properties and microstructure of long glass fiber reinforced polypropylene processed by rapid heat cycle injection molding
