

Accepted Manuscript

Interlayer polymerization in amine-terminated macromolecular chain-grafted expanded graphite for fabricating highly thermal conductive and physically strong thermoset composites for thermal management applications

Yinhang Zhang, Jang Rak Choi, Soo-Jin Park

PII: S1359-835X(18)30140-4

DOI: <https://doi.org/10.1016/j.compositesa.2018.04.001>

Reference: JCOMA 4995

To appear in: *Composites: Part A*

Received Date: 6 January 2018

Revised Date: 4 March 2018

Accepted Date: 1 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Manuscript submitted to "Composites Part A" as an original paper

Interlayer polymerization in amine-terminated macromolecular chain-grafted expanded graphite for fabricating highly thermal conductive and physically strong thermoset composites for thermal management applications
