Current progress and challenges in engineering viable artificial leaf for solar water splitting

Phuc D. Nguyen, Tuan M. Duong, Phong D. Tran

PII: S2468-2179(17)30135-1

DOI: [10.1016/j.jsamd.2017.08.006](https://doi.org/10.1016/j.jsamd.2017.08.006)

Reference: JSAMD 120

To appear in: *Journal of Science: Advanced Materials and Devices*

Received Date: 31 July 2017

Revised Date: 24 August 2017

Accepted Date: 26 August 2017

Please cite this article as: P.D. Nguyen, T.M. Duong, P.D. Tran, Current progress and challenges in engineering viable artificial leaf for solar water splitting, *Journal of Science: Advanced Materials and Devices* (2017), doi: 10.1016/j.jsamd.2017.08.006.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Current progress and challenges in engineering viable artificial leaf for solar water splitting

Phuc D. Nguyen,^{a,b} Tuan M. Duong^a and Phong D. Tran^{a*}
