Title: SiO₂-TiO₂ doped with Er³⁺/Yb³⁺/Eu³⁺ photoluminescent material: A spectroscopy and structural study about potential application for improvement of the efficiency on solar cells

Authors: Juliana M.M. Buarque, Danilo Manzani, Sérgio Luis Scarpari, Marcelo Nalin, Sidney J.L. Ribeiro, Jennifer Esbenshade, Marco A. Schiavon, Jefferson L. Ferrari

PII: S0025-5408(18)31564-2
DOI: <https://doi.org/10.1016/j.materresbull.2018.07.007>
Reference: MRB 10088

To appear in: *MRB*

Received date: 23-5-2018
Revised date: 5-7-2018
Accepted date: 5-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
