Optimization of $\text{Ni}^{2+}/\text{Ni}^{3+}$ ratio in reduced graphene oxide/nickel oxide nanohybrids for platinum free dye sensitized solar cells

Rajinder Singh, Sanjeev Kumar, R.K. Bedi, Vibha Saxena, D.K. Aswal, Aman Mahajan

PII: S0022-3697(18)30304-4

DOI: [10.1016/j.jpcs.2018.07.019](https://doi.org/10.1016/j.jpcs.2018.07.019)

Reference: PCS 8673

To appear in: *Journal of Physics and Chemistry of Solids*

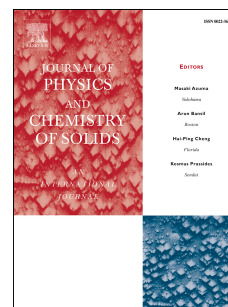

Received Date: 6 February 2018

Revised Date: 24 July 2018

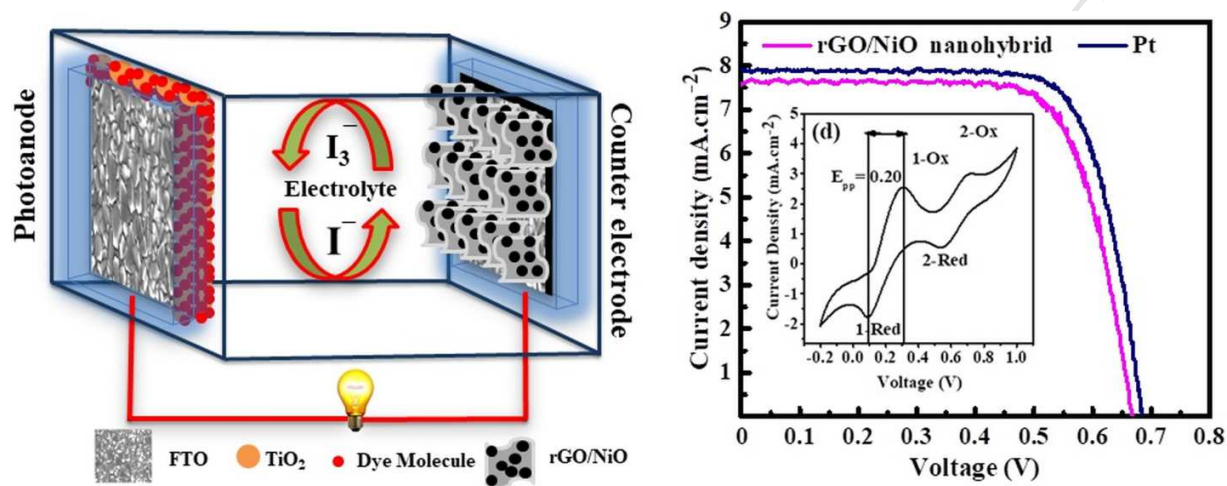

Accepted Date: 25 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
