Efficient device for the benign removal of organic pollutants from aqueous solutions using modified mesoporous magnetite nanostructures

H. Vojoudi, A. Badiei, A. Amiri, A. Banaei, G.M. Ziarani, K. Schenk-Joß

PII: S0022-3697(17)30661-3

DOI: [10.1016/j.jpcs.2017.10.029](https://doi.org/10.1016/j.jpcs.2017.10.029)

Reference: PCS 8259

To appear in: *Journal of Physics and Chemistry of Solids*

Received Date: 15 April 2017

Revised Date: 19 June 2017

Accepted Date: 20 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Home-made Device For
Dye Pollution
Removal
