This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Research Highlights:

- 1- Chalcogenide glasses have wide range of technical applications.
- 2- The investigation of $\text{Se}_{85}\text{In}_{15-x}\text{Sb}_x$ has significant applications in electronic devices.
- 3- The phase transformation study gives remarkable information.
- 4- HRXRD and FESEM have been used for structural studies.
- 5- The outcome shows the possible applications in different technical devices.
