This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

-
-
- Successful synthesis of $LaAlO_3$ using starch
- $LaAlO_3$ nucleation was identified within a mixed lanthanum-aluminum precursor at 700^{o}C
- Residual OH groups and anions stabilize the nanocomposite structure of perovskite
- Perovskite with a La rich surface with distortions partly persistent upto 1300^{o}C
