Metal-Free Heterojunction of Graphitic Carbon Nitride Composite with Superior and Stable Visible-Light Active Photocatalysis

Induja M. Sundaram, Sivaprakash Kalimuthu, Gomathi priya P

PII: S0254-0584(17)30823-4

DOI: 10.1016/j.matchemphys.2017.10.041

Reference: MAC 20080

To appear in: *Materials Chemistry and Physics*

Received Date: 28 March 2017

Revised Date: 04 October 2017

Accepted Date: 13 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- The g-C<sub>3</sub>N<sub>4</sub> heterojunctions with efficient visible light activity was prepared.
- Effective charge separation of heterojunction enhances the degradation of MB.
- Synthesized metal-free heterojunction render excellent performance and stability.
