The effects of hybrid nano-powder of zinc oxide and multi walled carbon nanotubes on the thermal conductivity of an antifreeze

Hamid Bagheri, Afshin Ahmadi Nadooshan

PII: S1386-9477(17)31624-7

DOI: [10.1016/j.physe.2018.06.017](https://doi.org/10.1016/j.physe.2018.06.017)

Reference: PHYSE 13188

To appear in: *Physica E: Low-dimensional Systems and Nanostructures*

Received Date: 21 October 2017

Revised Date: 5 June 2018

Accepted Date: 18 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Effects of hybrid nano-powder of zinc oxide and
multi walled carbon nanotubes on the thermal
conductivity of an antifreeze

Hamid Bagheri^a, Afshin ahmadi Nadooshan^{b,*}
