Monte Carlo study of magnetic and thermodynamic properties of a 2D boron clusters in a magnetic field

Kai-Le Shi, Wei Jiang

PII: S1386-9477(18)30078-X

DOI: [10.1016/j.physe.2018.03.022](https://doi.org/10.1016/j.physe.2018.03.022)

Reference: PHYSE 13088

To appear in: *Physica E: Low-dimensional Systems and Nanostructures*

Received Date: 22 January 2018

Revised Date: 22 March 2018

Accepted Date: 23 March 2018

Please cite this article as: K.-L. Shi, W. Jiang, Monte Carlo study of magnetic and thermodynamic properties of a 2D boron clusters in a magnetic field, *Physica E: Low-dimensional Systems and Nanostructures* (2018), doi: 10.1016/j.physe.2018.03.022.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Monte Carlo study of magnetic and thermodynamic properties of a 2D boron clusters in a magnetic field

Kai-Le Shi, Wei Jiang*

School of Science, Shenyang University of Technology, Shenyang 110870, China

Magnetic properties of the 2D boron clusters have been examined by using Monte Carlo simulation.
