Synthesis, structural, morphological, optical and magnetic characterization of iron oxide ($\alpha\text{-Fe}_2\text{O}_3$) nanoparticles by precipitation method: Effect of varying the nature of precursor

Abdelmajid Lassoued, Mohamed Saber Lassoued, Brahim Dkhil, Salah Ammar, Abdellatif Gadri

PII: S1386-9477(17)31318-8

DOI: [10.1016/j.physe.2017.12.004](https://doi.org/10.1016/j.physe.2017.12.004)

Reference: PHYSE 12975

To appear in: *Physica E: Low-dimensional Systems and Nanostructures*

Received Date: 27 August 2017

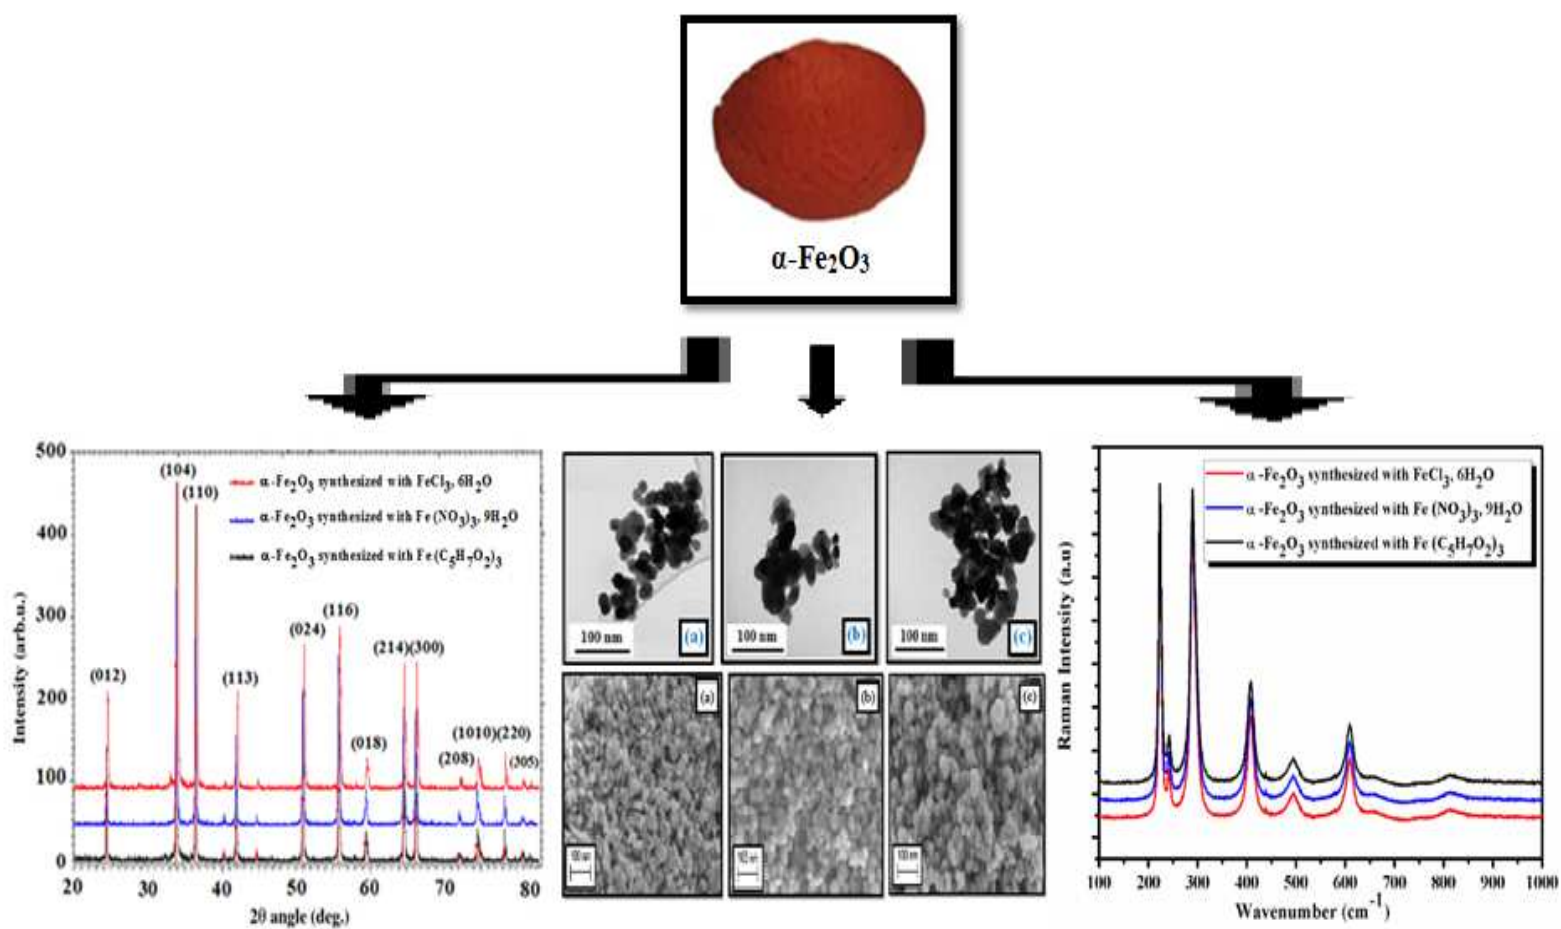

Revised Date: 24 November 2017

Accepted Date: 1 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
