

Accepted Manuscript

Multilayer solar cell waveguide structures containing metamaterials

Houria Hamouche, Mohammed.M. Shabat, Daniel M. Schaadt

PII: S0749-6036(16)30439-6

DOI: [10.1016/j.spmi.2016.08.047](https://doi.org/10.1016/j.spmi.2016.08.047)

Reference: YSPMI 4483

To appear in: *Superlattices and Microstructures*

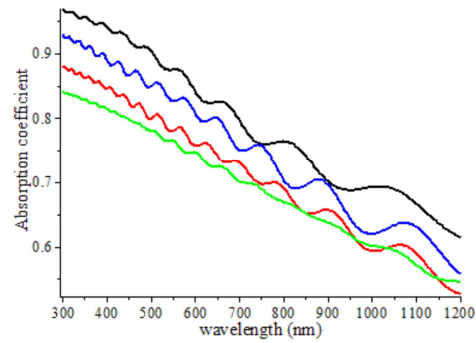

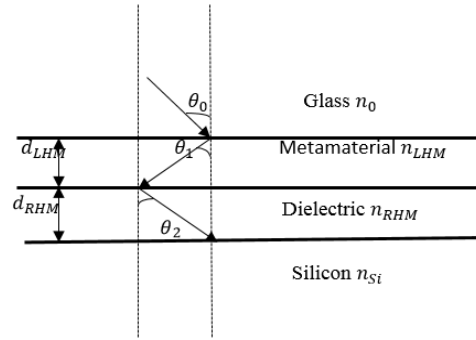

Received Date: 8 July 2016

Revised Date: 27 August 2016

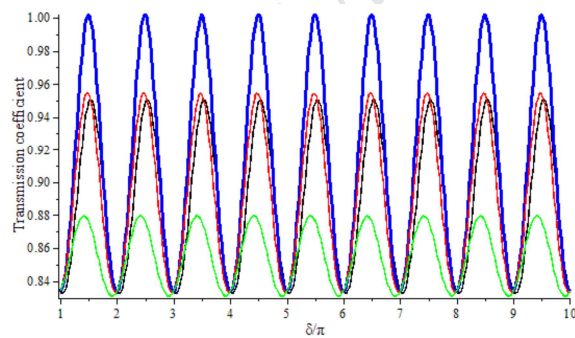

Accepted Date: 28 August 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Absorption coefficient as a function of wavelength for pair metamaterial-dielectric multilayered structure ($d_{LHM} = 900$ nm, $d_{RHM} = 150$ nm).

Transmission coefficient as a function of cavity length ($d_{LHM} = 450$ nm).
