

## Accepted Manuscript

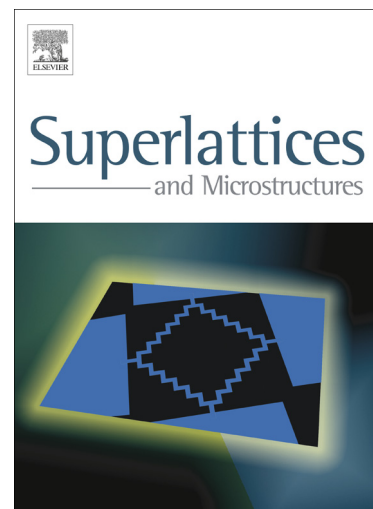

Formations of boron-doped and nitrogen-doped silicon nanotubes: DFT studies

Mahmoud Mirzaei

PII: S0749-6036(13)00282-6  
DOI: <http://dx.doi.org/10.1016/j.spmi.2013.09.001>  
Reference: YSPMI 2993

To appear in: *Superlattices and Microstructures*

Received Date: 22 June 2013  
Revised Date: 27 August 2013  
Accepted Date: 1 September 2013

Please cite this article as: M. Mirzaei, Formations of boron-doped and nitrogen-doped silicon nanotubes: DFT studies, *Superlattices and Microstructures* (2013), doi: <http://dx.doi.org/10.1016/j.spmi.2013.09.001>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

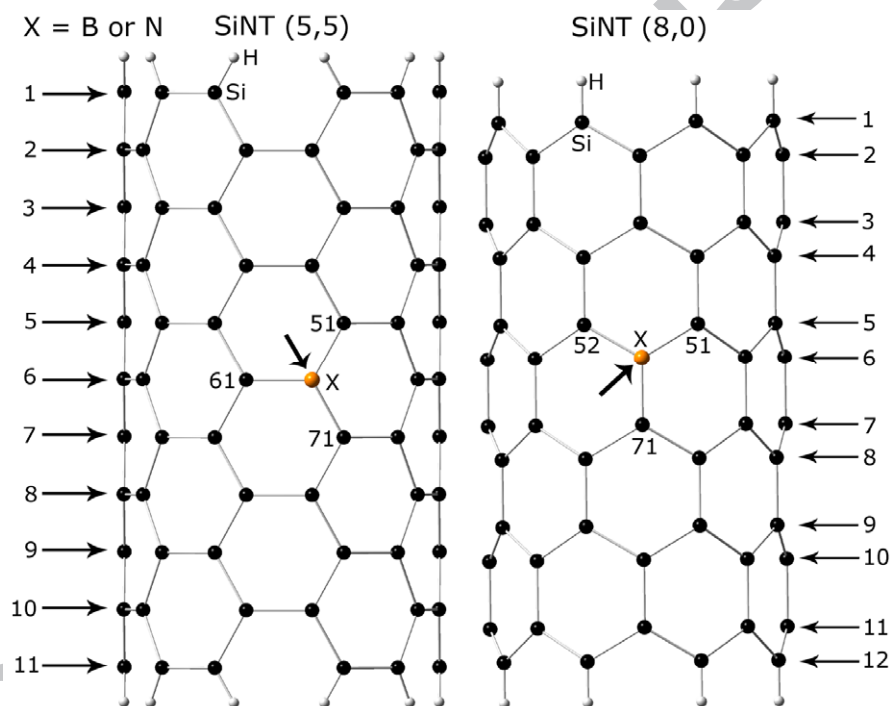

# Formations of boron-doped and nitrogen-doped silicon nanotubes: DFT studies

Mahmoud Mirzaei \*

*Laboratory of Nano Computations (LNC), Department of Medical Nanotechnology, Pharmaceutical Sciences Branch,*

*Islamic Azad University, Tehran, Iran*

## Graphical abstract

## Highlights

- Boron-doped silicon nanotubes could be formed.
- Nitrogen-doped silicon nanotubes could be formed.
- Boron-doped silicon nanotubes could be formed better than nitrogen-doped ones.
