This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The authors would like to thank funding support from Australian Research Council under the Future Fellowships scheme (FT160100107) and The University of Sydney.

## Abstract

Sustainable oxygen evolution reaction (OER) and oxygen reduction reaction (ORR) electrocatalysts are desirable for many energy storage and conversion systems. Australian dairy
