

Author's Accepted Manuscript

Lightweight, free-standing 3D interconnected carbon nanotube foam as a flexible sulfur host for high performance lithium-sulfur battery cathodes

Raghunandan Ummethala, Martin Fritzsche, Tony Jaumann, Juan Balach, Steffen Oswald, Rafał Nowak, Natalia Sobczak, Ivan Kaban, Mark. H. Rummeli, Lars Giebeler

PII: S2405-8297(17)30022-3
DOI: <http://dx.doi.org/10.1016/j.ensm.2017.04.004>
Reference: ENSM154

To appear in: *Energy Storage Materials*

Received date: 13 January 2017
Revised date: 17 March 2017
Accepted date: 18 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and a review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
