Characterization of Laves phase precipitation and its correlation to creep rupture strength of ferritic steels

S. Zhu, M. Yang, X.L. Song, S. Tang, Z.D. Xiang

PII: S1044-5803(14)00296-4
DOI: doi: [10.1016/j.matchar.2014.10.004](https://doi.org/10.1016/j.matchar.2014.10.004)
Reference: MTL 7696

To appear in: *Materials Characterization*

Received date: 25 June 2014
Revised date: 4 October 2014
Accepted date: 6 October 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Characterization of Laves phase precipitation and its correlation to creep rupture
strength of ferritic steels**
