

Author's Accepted Manuscript

Work hardening behaviour in banded dual phase steel structures with improved formability

B.L. Ennis, C. Bos, M.P. Aarnts, P.D. Lee, E. Jimenez-Melero

PII: S0921-5093(17)31684-2
DOI: <https://doi.org/10.1016/j.msea.2017.12.078>
Reference: MSA35920

To appear in: *Materials Science & Engineering A*

Received date: 2 October 2017
Revised date: 19 December 2017
Accepted date: 20 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Work hardening behaviour in banded dual phase steel structures with
improved formability
